RONDO®

CSR

Australia's trusted name in building products and solutions since 1942

CSR has proudly been a part of the Australian building market since 1942 and is the name behind some of Australia's most recognised building products brands. We have a strong history of creating innovative and sustainable building materials that work together to provide better whole-of-project solutions across the Australian commercial and residential construction industries.

We have a long history of helping builders construct durable, compliant hospitals across Australia.

When you partner with CSR and Rondo, you can be sure you're working with a brand that provides exceptional quality, unrivalled knowledge and support, as well as an unwavering focus on building a better future for Australia.

Hospital construction support you can depend on

Hospital new builds and redevelopments continue to be a growing segment in the building industry throughout Australia.

Delivering high quality construction solutions for hospital projects that are seamless, on time and on budget is a big undertaking. For builders, navigating the complexities of product selection, evolving trends, strict compliance and the unique requirements of the hospital segment can be overwhelming and time consuming.

CSR and Rondo simplify this process and offers whole-project support. From project concept to completion, we offer expert guidance and innovative design solutions backed by our extensive knowledge and experience in the hospital segment. We understand time-critical needs you have in winning projects and ensuring you deliver solutions to meet the highest Australian Standards.

This support, along with access to the nation's most extensive range of high-performance building products, empowers you to deliver cutting-edge hospitals—efficiently, confidently, and compliant every step of the way.

Introducing the CSR & Rondo Hospital Systems Design Details

The Hospital Systems Design Details is a comprehensive library designed to support hospital construction from start to finish. It is the latest innovation added to our support platform. Leveraging our extensive experience in the hospital sector, it provides access to most of the key building systems essential for strong and compliant hospital construction.

With an extensive library of system details and comprehensive information, the detail pack ensures your build meets all necessary specifications with full compliance. All drawings in the pack are supported by a NATA registered testing authority for National Construction Code (NCC)/FRL compliance. We'll support you every step of the way, removing guesswork, streamlining the detailing process and providing everything you need to confidently complete your hospital project.

Fast track your next hospital project with immediate access to compliant and detailed systems drawings

Say goodbye to the time-consuming process of briefing and waiting to get drawings designed from scratch.

With immediate access to the vast majority of hospital-specific, compliant systems drawings, when you partner with CSR & Rondo, you can quickly and confidently complete winning hospital tender documents to secure your hospital project.

And throughout the project, the Hospital Systems Specification Detail Pack will save contractors many hours in drafting time with readily available drawings in CAD format that already meet the NCC and FRL compliance standards for hospitals.

Including almost all **hospital-specific, detailed system drawings**, the Hospital Systems Design Details is just one of the ways we can support you in your next hospital project.

Eliminate the need to have details such as fire junctions tested and approved with access to pre approved details. Fire junction construction details included in the Design Details;

- Fire wall head and base details
- Fire wall to concrete column details
- Fire wall to roof details
- Seismic fire rated details

Whole-of-Project Customised support

Partnering with CSR and Rondo early in your hospital project, means you will have access to a comprehensive support platform, based on our extensive knowledge, experience and relentless commitment to system solutions, problem-solving, and execution. We are committed to working with you to create building solutions you'll be proud to sign your name to.

The Hospital Systems Project Support Package gives you access to a total support solution for your next hospital project

The Hospital Systems Design Details

Containing detailed, pre-approved, compliant drawings for the vast majority of hospital building systems in Australia.

Customised Solutions

Hospital projects often have unique requirements tailored to the needs of their local community. For any customised solutions not covered in the Hospital Systems Design Details, our team provides effective, bespoke system solutions.

Dedicated Project Management

Not only will you be allocated a dedicated project manager for ongoing support throughout your project, you will have access to the CSR knowledgebase with technical and tailored support as and when you need it.

Hospitals Systems Design Guide

Detailing the design considerations as stipulated by the National Construction Code (NCC) and non-NCC considerations, along with insightful real-life case studies.

Access here:

Architectural Finishes Schedule
